Target Audience

This document is intended for those who are running their own hosting business and they need their services to be synchronized with the latest build/version of HC.

Why Upgrade?

Hosting Controller releases Windows Build03/Linux Build 03. These builds provide fixes for issues which were reported in past few weeks. It is recommended to update HC installation on your machines. Visit [Service Pack](#) section to download latest builds.

Microsoft .Net Framework 2.0 must be installed on your HC server(s) prior to this installation. Moreover, this build removes .NET mappings from the root of the web server as it is not recommended to have .NET mappings on the root of the web server.

Enhancements and Fixes

This build slots in following enhancements and fixes:

Build No 8.00.0003: (Windows)

Enhancements

- ✓ Domain Registrar Integration:
 - New integration of Realtime Registrar (<http://realtimeregister.com>)
- ✓ Exchange Server GUI Enhancement:
 - It allows you to use SMTP Mail Server for HC mail activity
 - Improved "User listing" while adding/editing List
 - Improved "User listing" while adding/editing Accepted/Rejected Senders
 - No other mail domain is being shown at the time of adding an email address for Lists and Public Folders
 - DisplayName on Public Folder listing page
 - The user is shown in this format i.e. "DisplayName (Email-Address)" on Public Folder Permission page
- ✓ Plan Manager:
 - Plan instance name with date created
 - Plan violation flag flexibility

Bugs Fixed:

- ✓ Bug Fixed: SharePoint sites were not creating at webadmin level
